

2023 energy storage industry ranking

Which energy storage companies shipped the most in 2023?

Additionally, Samsung SDI and LG's energy-storage cell shipments totaled nearly 14 GWh in 2023, translating to a slightly lower market share of 7%. For utility-scale energy storage, CATL, BYD, EVE Energy, Hithium, and REPT BATTERO shipped the most in 2023. CATL shipped more than 65 GWh and the rest less than 22 GWh.

Will energy storage grow in 2023?

Global energy storage's record additions in 2023 will be followed by a 27% compound annual growth rate to 2030, with annual additions reaching 110GW/372GWh, or 2.6 times expected 2023 gigawatt installations. Targets and subsidies are translating into project development and power market reforms that favor energy storage.

How big is the energy storage industry?

Energy storage systems (ESS) in the U.S. was 27.57 GW in 2022 and is expected to reach 67.01 GW by 2030. The market is estimated to grow at a CAGR of 12.4% over the forecast period. The size of the energy storage industry in the U.S. will be driven by rising electrical applications and the adoption of rigorous energy efficiency standards.

Which companies shipments the most in 2023?

The top 5 companies shipping the most in 2023 remained CATL, BYD, EVE Energy, REPT BATTERO, and Hithium. CATL led with shipments exceeding 70 GWh. BYD and EVE Energy followed closely each with shipments of over 25 GWh, while REPT BATTERO and Hithium each ranked fourth and fifth with shipments of over 15 GWh.

Which region has the most energy storage devices in 2022?

The Asia Pacific was the largest segment in 2022 and accounted for more than 46.87% of the overall market share, owing to the presence of fast-growing economies such as China and India. Energy storage devices are critical in applications such as UPS and data centers because this region is prone to frequent power outages.

Will 9% of energy storage capacity be added by 2030?

We added 9% of energy storage capacity (in GW terms) by 2030 globally as a buffer. The buffer addresses uncertainties, such as markets where we lack visibility and where more ambitious policies may develop that we haven't predicted. We revised our buffer calculation methodology in this market outlook.

The energy storage systems market size exceeded USD 668.7 billion in 2024 and is expected to grow at a CAGR of 21.7% from 2025 to 2034, driven by the rising demand for grid stabilization and energy efficiency.

In the first half of the year, the capacity of domestic energy storage system which completed procurement

2023 energy storage industry ranking

process was nearly 34GWh, and the average bid price decreased by ...

This information was prepared as an account of work sponsored by an agency of the U.S. Government. Neither the U.S. Government nor any agency thereof, nor any of their employees, ...

In Wood Mackenzie's quarterly US PV Leaderboard and US Distributed Solar-plus-storage Leaderboard, both available via the US Distributed Solar Service, we rank the top ...

Overcapacity Concerns: While the energy storage industry's prosperity presents opportunities, it also raises concerns about overcapacity. As of July 2023, the capacity of the lithium power ...

The energy storage sector reached new heights in 2023, as showcased at the annual Energy Storage Carnival and the release of the Global Energy Storage Shipment Rankings for Chinese Enterprises by the ...

The world shipped 91.6 GWh of energy storage cells in the first half of 2023 (75.7 GWh for utility-scale and C& I ESS and 15.9 GWh for residential and telecom ESS), with a ...

Figure 2: Cumulative installed capacity of new energy storage projects commissioned in China (as of the end of June 2023) In the first half of 2023, China's new energy storage continued to develop at a ...

China is solidifying its position as the largest energy storage market in the world for the rest of the decade. Government investments and policies are starting to bear fruit as project pipelines grow larger due to ...

In 2023, BYD is expected to become one of the top three energy storage system integrators in China and may even compete for the top spot with CRRC Zhuzhou Locomotive. In 2022, BYD was not even in ...

The world shipped 143.8 GWh of energy-storage cells in the first three quarters of 2023, with utility-scale and C& I accounting for 122.2 GWh and residential and ...

By Helen Kou, Energy Storage, BloombergNEF Three years into the decade of energy storage, deployments are on track to hit 42GW/99GWh, up 34% in gigawatt hours from our previous forecast. ...

Wood Mackenzie's leaderboard. Research firm Wood Mackenzie has released its latest global battery energy storage system BESS integrator report, for 2023, showing the ...

How will the energy storage industry change in 2023? As we approach the end of 2023, the energy storage industry is undergoing a transformative journey, marked by significant shifts in ...
