Do on-grid solar panels reduce electricity costs?

Though on-grid systems do reduce your electricity costs by relying mostly on solar energy, you still need grid-tied power when your solar panels aren't in use or sun hours are limited. An off-grid system lets you generate all of your own energy. This means you won't receive backup power from the grid during power outages or low-sunlight days.

How do I choose a battery for my off-grid installation?

Choose your battery: Your battery should provide temporary power to your system. Most batteries are 12-volt (V), but 24V and 48V options are available. Based on our research, we recommend using either FLA or lithium-ion batteries for your off-grid installation. Select your charge controller (s): You'll need a charge controller for each battery.

Why should you choose an off-grid solar battery?

Your choice of off-grid solar batteries significantly impacts the performance and reliability of your system. Let's compare the most popular options: High efficiency, long lifespan, compact size. Higher upfront cost. Budget-friendly, widely available. Shorter lifespan, less efficient. Safe, durable, excellent longevity. Higher initial investment.
