

Business energy storage project financing options in Singapore 2026

Can a battery energy storage system improve business operations in Singapore?

The push for cleaner energy in business operations is already showing results in Singapore. Battery Energy Storage Systems have been piloted and adopted by forward-looking firms, demonstrating the kind of outcomes the EEG is designed to encourage.

Why should Singapore set up a future energy fund?

It is thus imperative that we plan ahead and set aside resources for Singapore's energy transition including for new infrastructure depending on technological developments. The Government will therefore set up a Future Energy Fund to support infrastructure investments for our energy transition towards a net-zero future.

Why is Singapore a good place to invest in renewables?

Finally, Singapore has built up a vibrant ecosystem of companies across the value chain ranging from clean energy solution providers, project and legal advisories and financiers that can support the development and execution of renewables projects in the region.

Why does Singapore need a new energy infrastructure?

Singapore is further challenged by our lack of domestic renewable energy resources. It is thus imperative that we plan ahead and set aside resources for Singapore's energy transition including for new infrastructure depending on technological developments.

Which energy transition infrastructure can be supported by the Future Energy Fund?

Examples of energy transition infrastructure which could be supported by the Future Energy Fund include undersea cablesto import low-carbon electricity as well as new hydrogen terminals and pipelines if we decide to adopt and scale up the use of hydrogen.

Can Singapore be a green financing hub?

We encourage companies to leverage Singapore's strengths as a green financing hubto tap on the wide range of world-class financial institutions here,such as UOB and Clifford Capital to support investments into renewables.

The next big challenge for energy storage, after bringing down the cost so that storage is economic and finding a suitable business model, is financing.

Singapore aims to achieve net zero emissions by 2050. The power sector plays a critical role, as it currently contributes to about 40% of Singapore"s carbon footprint. This is challenging given ...
