

Business energy storage tender price in Canada 2026

What is the largest storage-based procurement in Canada?

The IESO issued the largest storage-based procurement in Canada in February 2023 with the Expedited Long-Term 1 RFP (the ELT1). The ELT1 resulted in a total of 739 MW of utility-scale storage being procured, with in-service dates in 2026. The weighted average price for successful proponents was approximately CAD836/MW.

What is the fastest growing energy storage technology in Canada?

BESS is the fastest growing energy storage technology in Canada and is also the dominant storage technology in terms of capacity and number of sites. All but four projects proposed to be commissioned by 2030 are battery storage, with two CAES and two PHS projects also proposed.

What types of energy storage are available in Canada?

There are three main types of energy storage currently commercially available in Canada: Storage is playing an increasingly important role in the electricity system by improving grid reliability and power quality, and by complementing variable renewable energy sources (VRES) like wind and solar.

How much energy would a storage asset cost in 2022?

When combined with a marginal cost offer, the total energy offer would be \$376/MWh - or nearly eight times the average HOEP in 2022. Storage assets that are operated more infrequently will require much higher energy offers - in some cases, higher than the ceiling price in Ontario's wholesale energy market.

Are utility-scale energy storage systems coming to Canada?

By Kristyn Annis Chair, Energy Storage Canada Partner, Border Ladner Gervais, Toronto February 19, 2024
The last three years have seen utility-scale energy storage systems proliferate in Canada like never before.
