Can battery energy storage modernize Argentina's grid?

Argentina's ambitious push toward grid modernization through battery energy storage has received an enthusiastic response, with CAMMESA (Compañía Administradora del Mercado Mayorista Eléctrico) confirming the submission of 27 project proposals from 15 companies under its AlmaGBA program.

Will Argentina integrate new electricity storage infrastructure into urban distribution networks?

This national and international open call, part of Resolution SE 67/2025, marks Argentina's first large-scale effort to integrate new electricity storage infrastructure into urban distribution networks.

Can energy storage be a reliable source of energy?

As the opportunity to build energy storage as a reliable source in grids and to decarbonize becomes critical on a global stage, the oversubscribed tender launched by Argentina demonstrates the demand for scalable and bankable C&I energy storage systems projects, as well as the efficiency of collaborating with the government in their realization.

What is the Buenos Aires grid program?

Intended to strengthen the grid in the greater Buenos Aires region, the program has attracted a lot of attention; it has been subscribed to projects that are about twice the desired capacity.
