

Cheapest household energy storage installation offer in Australia

What rebates are available for battery storage systems in Australia?

This page covers current rebates, grants, and interest-free loans available across Australian states and territories that make battery storage systems more affordable and improve payback times. The Cheaper Home Batteries Program is a \$2.3 billion subsidy scheme designed to reduce home battery installation costs by around 30%.

What is Australia's cheaper home battery program?

Australia's Cheaper Home Battery Program, launching 1 July 2025, offers households up to \$372 rebate for every kWh of installed battery storage. Here's what that looks like: Note: Eligibility and rebate caps may vary by state or territory.

How much does a home battery cost in Australia?

Thanks to the Australian Government's new Cheaper Home Battery Program, which offers up to \$372 per kilowatt-hour (kWh) of installed battery capacity, there has never been a better time to invest in energy independence.

How can I save money on solar energy in South Australia?

South Australians can access subsidies and low-interest loans through the Home Battery Scheme, significantly reducing upfront costs. Other states, like New South Wales and the ACT, periodically roll out pilot programs and incentives. Always consult your state's energy department or reputable solar installers for the latest information.

What is home battery storage?

Home battery storage allows homeowners to store excess solar energy generated during the day for use later, such as at night or during peak energy demand. By capturing and storing energy from your solar panels, home battery storage reduces reliance on the grid, lowers electricity bills, and boosts energy independence.

Does home battery storage work with solar?

By capturing and storing energy from your solar panels, home battery storage reduces reliance on the grid, lowers electricity bills, and boosts energy independence. It's a smart investment that maximises the efficiency of your home solar system. How
