

Development and reform commission new energy storage development

What is the implementation plan for the development of new energy storage?

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.

Will this notice impact energy storage demand in the short term?

This Notice may impact energy storage demand in the short term. Up until 2024, mandatory storage allocation policies were always the primary driver of China's energy storage market. In 2024, for instance, energy storage installations tied to new energy projects accounted for nearly 40% of total capacity.

What is the compensation standard for new-type energy storage in 2025?

For 2025, the compensation standard for standalone new-type energy storage is set at RMB 0.35/kWh. Projects that fail to begin construction by June 30, 2025, will not be eligible for the 2025 compensation.

Why is investor participation important in the energy storage industry?

Investor participation is beneficial for the development of the energy storage industry. Facing trends, they should keep a cool head in assessing business models to identify high-quality segments and targets.

Which energy storage projects have a low utilisation co-efficient?

According to a survey by the China Electricity Council, new energy distribution and storage projects have a low equivalent utilisation co-efficient of 6.1%, the lowest among the application scenarios, while the average for electrochemical energy storage projects is 12.2% (Figure 8).

Are standalone energy storage projects economically viable?

With the cancellation of mandatory storage allocation, market attention has shifted to standalone energy storage. However, the economic viability of standalone projects remains under pressure. Historically, a major revenue source for standalone energy storage plants has been capacity leasing fees paid by projects coupled with new energy.

All provinces, autonomous regions, municipalities directly under the Central Government, Xinjiang Production and Construction Corps Development and Reform Commission, Energy Bureau, and agencies ...

In July, the National Development and Reform Commission and the National Energy Administration co-released a guideline on power storage development. The guideline ...

Previously, in February 2025, the National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) issued Document No. 136, explicitly ...

Development and reform commission new energy storage development

The State Council released a circular on the implementation plan to promote the high-quality development of new energy in the new era, drawn up by the National Development ...

The introduction of the 136 document undoubtedly brings profound changes to the energy industry, with new development opportunities emerging in virtual power plants, ...

China has released an implementation guideline on strengthening the integration of new energy vehicles (NEVs) with the power grid, according to the National Development and ...

On March 21, the National Development and Reform Commission and the Energy Bureau issued the implementation Plan for the Development of New Energy Storage in the 14th five-year Plan.

China is accelerating the market-oriented reform of its renewable power pricing system in a bid to build a new power system and promote the sustainable development of ...

On July 19, 2023, the Jiangsu Provincial Development and Reform Commission issued the Implementation Plan for the Development of New Energy Storage Projects in Coastal Areas (2023-2027).

News Chairman Zheng Shanjie met with Siemens CEO Roland Busch On March 26th, Zheng Shanjie, Chairman of the National Development and Reform Commission (NDRC), met with ...

On March 26th, Zheng Shanjie, Chairman of the National Development and Reform Commission (NDRC), met with Roland Busch, President and Chief Executive Officer of Siemens AG, who also serves as Chairman of the ...

This document was released by the National Development and Reform Commission and the National Energy Administration in February 2025. It emphasizes the establishment of energy storage as a ...

To further accelerate the development of energy storage, the National Development and Reform Commission said that in 10 years" time, the development of the energy storage industry will be ...

New types of energy storage, hydrogen energy, and biomass energy were developed in line with local conditions. The installed renewable power capacity accounted for ...

The National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) have issued a notice on promoting the integration of new energy sources like wind power and solar ...

In June, the National Development and Reform Commission (NDRC) issued the 14th Five-Year Plan (FYP) for Renewable Energy, setting out quantitative targets for renewable energy that largely ...

Development and reform commission new energy storage development

China aims to further develop its new energy storage capacity, which is expected to advance from the initial stage of commercialization to large-scale development by 2025, with an installed ...

English translations of Chinese energy policy, news, and statistics. Focused on wind power, PV, solar, biomass and other renewable energy. 10+ year archives of Chinese ...

In 2020, under the direction of the National Development and Reform Commission to promote energy storage and lay a solid foundation for industrial development, ...

News Chairman Zheng Shanjie met with Siemens CEO Roland Busch On March 26th, Zheng Shanjie, Chairman of the National Development and Reform Commission (NDRC), met with Roland Busch, President and ...

On June 5, the Guangdong Provincial Development and Reform Commission and the Guangdong Provincial Energy Bureau issued Measures to Promote the Development of ...

Foreword Stepping up efforts to develop new energy storage technologies is critical in driving renewable energy adoption, achieving China's 30/60 carbon goals, and establishing a new ...

On June 7, the National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) issued the Notice on Promoting the Participation of New ...

That's where China's National Development and Reform Commission (NDRC) steps in with game-changing new energy storage policies announced this March. These regulations aren't just ...

Recently, the National Development and Reform Commission issued the "Electricity Reliability Management Measures (Interim)", which will be implemented from June 1.

On March 4th, in order to encourage all kinds of investors to make full use of desert areas to promote the construction of wind generation, photovoltaic generation and other new energy projects and ...

According to the Guiding Opinions on Accelerating the Development of New Energy Storage report jointly issued by the National Development and Reform Commission ...

To this end, the country has issued multiple policies to guide and promote the scientific, systematic, and rapid development of the new energy storage industry.

According to the Guiding Opinions on Accelerating the Development of New Energy Storage report jointly issued by the National Development and Reform Commission and the National Energy ...

Development and reform commission new energy storage development

A close examination of the document reveals a well-designed reform framework that not only emphasizes market competition but also ensures the continued development of ...
