

Energy storage financial news

Do investors underestimate the value of energy storage?

While energy storage is already being deployed to support grids across major power markets, new McKinsey analysis suggests investors often underestimate the value of energy storage in their business cases.

How do I evaluate potential revenue streams from energy storage assets?

Evaluating potential revenue streams from flexible assets, such as energy storage systems, is not simple. Investors need to consider the various value pools available to a storage asset, including wholesale, grid services, and capacity markets, as well as the inherent volatility of the prices of each (see sidebar, "Glossary").

Should energy storage be undervalued?

The revenue potential of energy storage is often undervalued. Investors could adjust their evaluation approach to get a true estimate--improving profitability and supporting sustainability goals.

Tesla to reportedly pay Samsung SDI \$2 billion over 3 years for energy storage system batteries, amid 44% growth in business.

The Energy Storage Report is now available to download. In it, you'll find the best of our content from Energy-Storage.news Premium and PV Tech Power, as well as new articles covering deployments, ...

Elsewhere, Energy-Storage.news readers may have noticed a few days ago that ESS Inc's partner and technology licensee in Australia, Energy Storage Industries Asia-Pacific (ESI), is being awarded funding for ...

Our Next Energy (ONE) has launched US-made batteries while BESS firm American Energy Storage Innovations (AESI) is winding down its business.

The government of Alberta, Canada, has announced that CA\$25 million (US\$20.1 million) in financial support has been offered for solar-plus-storage and pumped ...

Long-duration zinc battery energy storage system maker Eos Energy Enterprises' order book, backlog and sales pipelines have greatly increased, but the company ...

Battery energy storage projects face distinct technical challenges that complicate their development and financing. A key concern is the degradation of battery systems over time.

The Oregon, US-headquartered technology company, which holds the IP for a proprietary flow battery based on iron and saltwater electrolyte aimed at long-duration energy ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and
