

Enterprise energy storage financing leasing program

Why do energy storage projects need project financing?

The rapid growth in the energy storage market is similarly driving demand for project financing. The general principles of project finance that apply to the financing of solar and wind projects also apply to energy storage projects.

Can you finance a solar energy storage project?

Since the majority of solar projects currently under construction include a storage system, lenders in the project finance markets are willing to finance the construction and cashflows of an energy storage project. However, there are certain additional considerations in structuring a project finance transaction for an energy storage project.

How can the western area Power Administration support energy storage project financing?

The Western Area Power Administration is a good example of how one of these groups can support energy storage project financing of large projects. Through an infrastructure financing program aimed at expanding and modernizing the electric grid, WAPA's Transmission Infrastructure Program (TIP) can make loans to project.

Will a tax credit be available for energy storage projects?

However, with the passage of the Inflation Reduction Act of 2022, tax credits are now available for standalone energy storage systems, and thus lenders may be willing to provide bridge capital that is underwritten based on the receipt of proceeds from an anticipated tax equity investment, similar to renewable energy projects.

What is the energy storage Finance Summit?

The Summit was the first Energy Storage Finance Advisory Committee Meeting for a U.S. Department of Energy sponsored study to issues and challenges surrounding project and portfolio valuation.

Are energy storage projects different than power industry project finance?

Most groups involved with project development usually agree that energy storage projects are not necessarily different than a typical power industry project finance transaction, especially with regards to risk allocation.

In this model, it is assumed that only the power generation enterprise has the ability to build the energy storage project, so the policy subsidy is given to the power generation enterprise. ...
