

# Home battery pack tender price in Greece 2025

Does Greece have a battery storage subsidy program?

Greece's latest auction has awarded subsidies to 188.9 MW of standalone, front-of-the-meter, utility-scale battery energy storage. The auction was the third and final edition of a battery storage subsidy program launched in 2023, with the country now turning its focus towards a new 4.7 GW unsubsidized BESS scheme.

Why is Greece launching a battery storage auction?

Initially a response to the COVID 19 pandemic, the focus has pivoted to support Greece's green energy transition. The storage auctions themselves require further approval under EU State aid rules. The pipeline of prospective battery storage projects now approaches 27GW, with over 500 projects granted a storage license.

How many projects have been awarded in Greece's first battery energy storage system?

The Greek Regulatory Authority for Energy has confirmed that 411.8 MW of projects have been awarded in the country's first standalone battery energy storage system (BESS) tender, which has attracted huge interest among developers. Investment and operating aid will be granted to 12 projects put forward by seven proponents.

Do hybrid batteries lose access to renewables auctions?

As in Spain, hybrid projects with co-located batteries that charge from the grid lose access to renewables auctions, however this has not deterred projects applying for 11B licenses.

As a result, adding battery storage to a home solar panel system is becoming increasingly popular and affordable. Solar battery prices Here's a look at the prices of some popular solar batteries.

The 8 companies that "pass" the tender for 190 MW of standalone batteries in Greece. First publication: newsmoney According to information from the Regulatory Authority ...
