Do countries impose export restrictions on lithium?

To give domestic companies a competitive edge, nations often impose export restrictions on raw materials such as lithium, cobalt, and nickel. This is particularly true with a few of the world's biggest lithium-producing nations, such as China, certain countries in Africa, and Chile.

Why is the lithium-ion battery market growing so fast?

The global lithium-ion battery market is growing faster than ever, led largely by a rise in demand for EVs, portable electronics, and grid energy storage. This rapid market growth has led to a spike in international production and distribution, which naturally has drawn the attention of local governments and governing international organizations.

How does lithium affect global supply?

This is particularly true with a few of the world's biggest lithium-producing nations, such as China, certain countries in Africa, and Chile. This reduces the availability of crucial materials globally, sending a ripple through supply chains and affecting global pricing.

Should lithium batteries be reliant on one supplier?

As policy is changing all of the time, it's good for companies to not be reliant on one supplier for all of their lithium battery supply needs. Trade wars also open the door for emerging territories to enter competition, such as India and Southeast Asia. Policies can also specifically target tech, a highly priced and heavily used consumer good.

Does local policy affect the global lithium supply chain?

In this instance, local policy has negatively affected the global lithium supply chain while promoting commerce within the borders of Chile. These local incentives can provide an opportunity to secure more stable and cost-effective material supplies.

Should you buy lithium batteries today?

Lithium batteries have become an increasingly important global product, and global policy has reflected as such, as nations will always leverage each other however they can. Tomorrow's policy is never certain, so make the purchases you want today in case policy changes for the worse.
