

Latest regulations on Thailand's energy storage subsidy policy

What is Thailand's energy policy for 2025?

Thailand's energy policy for 2025 underscores the country's commitment to sustainability, energy security, and economic growth through clean energy adoption and domestic energy development. Loading...

What is Thailand's energy policy?

Thailand's energy policy is also focused on enhancing the country's competitiveness by promoting clean energy to attract foreign investment. The government is positioning Thailand as a Digital Hub for ASEAN, with strong investor interest in data centers and cloud services.

What are Thailand's new energy regulations?

These regulatory drafts include revisions to oil fuel trade practices, new guidelines for solar rooftop installations, and the establishment of a Strategic Petroleum Reserve (SPR). This initiative is significant in the context of Thailand's broader goals of energy security, sustainability, and cost efficiency.

Will the SPR regulation protect Thailand's energy stability?

While the SPR regulation is still in the drafting stage and is expected to be presented to the House by 2025, its implementation will be a significant step in safeguarding Thailand's energy stability, especially in the face of global market uncertainties. Timeline and Legislative Process

What is the FIT scheme in Thailand?

The FiT scheme is a key aspect of Thailand's renewable energy policy, guaranteeing fixed prices for energy generated from renewable sources. This policy reduces the financial risk associated with renewable energy projects, making them more appealing to potential investors.

Are new solar panels tax deductible in Thailand?

Only new, Thailand-certified equipment with a 5-star energy label qualifies for the 150% business tax deduction. Second-hand or imported devices are excluded from this enhanced benefit, helping ensure quality and compliance. The permit-free, online notification process for residential rooftop solar is scheduled for late 2025.

A total of PLN 4 billion (\$1 billion) will be distributed under the subsidy scheme by the end of 2025 in a bid to bring online more than 5 GWh of energy storage projects by 2028.
