

Office building energy storage supplier quotation in Ethiopia 2025

How can the outlook contribute to the development of Ethiopian energy sector?

The Outlook has been developed in close cooperation with all partners with strong commitment, openness and good discussions. It is the ambition that the Outlook in the same way can contribute to the development of the Ethiopian energy sector. 1. Executive Summary

What is the outlook for energy policy in Ethiopia?

The outlook is meant as a review of the current energy policy. The purpose is not to give detailed recommendations - but more to give a solid foundation for a discussion of key issues within energy policy. In the current outlook, also Ethiopian Electric Utility (EEU) and Petroleum & Energy Authority (PEA) are participating.

Does Ethiopia have a stable electricity supply?

In recent years, Ethiopia's power system has faced increasing challenges in maintaining a stable electricity supply. Frequent power interruptions have several negative consequences, such as: Disruptions in production and delays. Limited benefits for end-users who rely on a stable electricity supply.

Why are energy infrastructure projects not working in Ethiopia?

Internal national security concerns continue to affect energy infrastructure projects. Conflicts in Sudan, South Sudan, Yemen, and Somalia are delaying Ethiopia's ability to strengthen energy cooperation with neighbouring countries and export electricity.

How can Ethiopia achieve universal electrification?

To achieve universal electrification, Ethiopia must adopt a comprehensive approach that prioritizes grid expansion while integrating broader energy planning strategies. Key policy and strategy measures include: Securing additional investment to strengthen distribution infrastructure and prioritize last-mile connections.

How much electricity does Ethiopia produce in 2040?

The share of solar in electricity generation reaches 17% in 2040. Ethiopia's net electricity exports until 2036 will primarily be driven by large-scale hydropower investments. However, net import of electricity is expected from 2038, as the pace of demand growth in Ethiopia exceeds that of supply, in the least-cost development. See Figure 6.4.
