

Oslo energy investment and coal storage group

The joint venture will establish a carbon capture facility at Klemetsrud in Oslo, which will capture 90% of all CO₂ in the flue gas from the waste-to-energy plant.

Shell, Equinor and TotalEnergies said on Thursday they will invest 7.5 billion Norwegian crowns (\$713.66 million) into expanding their flagship carbon storage project in western Norway after ...

Investment in clean energy has accelerated since 2020, and spending on renewable power, grids and storage is now higher than total spending on oil, gas, and coal.

Imagine a future where northern lights aren't the only thing glowing in Norway - picture streets lit by wind-stored energy and homes warmed by solar reserves.

Who will buy Fortum Oslo varme? Three companies will buy Fortum's share of the energy provider Fortum Oslo Varme. The City of Oslo and the companies will bring up to 6 billion NOK ...

The Longship project will capture about 400,000 tonnes of carbon dioxide annually from its Brevik plant and from 2029 is set to add 350,000 tonnes from a municipal waste plant in Oslo.

Norway has officially launched Longship, the world's first complete carbon capture and storage (CCS) value chain - from industrial capture to permanent seabed storage.

Equinor, Shell and TotalEnergies are investing in the Northern Lights project -- Norway's first licence for CO₂ storage on the Norwegian Continental Shelf and a major part of ...

Despite early setbacks at home and abroad, Norway's Equinor continues to invest heavily in CCS, hoping to become Europe's preferred CO₂ storage partner.

You know, Oslo's commitment to coal phase-out by 2025 isn't just political theater - it's a high-stakes balancing act. The city needs to replace 1.2 GW of coal-fired power generation while ...
