

Polansa energy storage electricity price adjustment

What are the new energy storage rules in Poland?

Poland's new rules state that energy storage facilities over 10MW require licensing to ensure they can provide services to Poland's National Power System. Facilities 10MW or smaller do not need licensing but do need to register with the transmission system operator or distribution system operator for their area.

Will freezing retail electricity prices lower Poland's inflation path?

Freezing retail electricity prices through September 2025 lowers Poland's inflation path, but it also begs the question of which steps need to be taken next. We see a balancing act emerging between ensuring the affordability of electricity prices and reaching the long-term goal of launching ambitious energy investment programmes

Are electricity prices regulated in Poland?

While retail electricity prices in Poland are heavily regulated, authorities have made several significant interventions in recent years to protect households from global energy shocks. In 2023, the electricity price was frozen at the 2022 level of PLN 412/MWh (net). A partial unfreeze was introduced in mid-2024.

Are smart electricity meters a good idea in Poland?

However, in order to explore the benefits of dynamic electricity tariffs, households need to have smart meters. But their deployment in Poland is among the smallest in the EU; only around 15% of electricity meters are "smart". Source: Analysis of Joint Research Center, 2023.

Why is EV charging exclusion a problem in Poland?

This exclusion raises concerns about the program's budget utilization and the broader development of electromobility in Poland. Another pressing issue is the expansion of EV charging infrastructure, which remains insufficient to meet the rising demand from an increasing number of electric vehicles entering the market. 5. The Need for Specialists

Will PLN 623/mwh rise in 2025?

Source: Poland Energy Commodity Exchange, ING. As the year draws to a close, officials have made the long-awaited decision to extend protective measures into 2025 to prevent retail prices from rising to the current tariff of PLN 623/MWh. In the case of no action, this tariff would come into action from 2025, which would mean a 25% hike.

Starting from the three modes of peak-valley arbitrage, maximum demand management and reactive power regulation service corresponding to time-of-use price, two-part price and ...
