

Rooftop solar battery project financing options in Guernsey 2026

How many solar panels are installed in Guernsey?

Since 2013, we've installed over 3.1 megawatts of energy generation capacity, equating to over 7,000 solar panels, all of which contribute to the States of Guernsey's ambitious net zero 2050 targets. We partner with brands like Maxeon SunPower and SolarEdge, giving clients access to the most trusted names in the industry.

How many panels should a Guernsey home have?

A typical Guernsey home has at least one roof that faces east, south or west, or a flat roof that may be open to all the sun's orientations. From a few panels to four panels or more and typically 6 to 10 panels, you can maximise your generation by maximising your roof spaces.

Who participates in the financing of solar projects?

Developers, independent power producers, solar panel manufacturers, engineering, procurement, and construction ("EPC") contractors, utility companies, financial investors and, more recently, commercial and industrial end-users all participate in the financing of solar projects in different manners and at different times.

How does a solar project finance deal work?

For typical solar project finance deals involving debt and tax equity, the construction loan is sized to be repaid from some combination of the permanent term loan and the tax equity investment.

Are solar projects financed with debt?

Though the prevalence of debt financing has perhaps been overshadowed in the solar industry by its cousin tax equity (more on that below), most solar projects are financed at some point in their life cycle with some manner of debt.

Can a solar project get financing?

All solar industry participants are well advised to remain on the lookout for issues that may impact a project's ability to obtain financing, regardless of where in the pipeline or life cycle the project is. Financing can be viewed as the epicenter of all aspects of project development.
