Why is the Middle East solar EPC market booming?

Middle East solar EPC market is driven by lowest solar energy tariffs globally, with bids ranging between 1.35 and 1.80 cents per kWh. Growing emphasis on integrating battery storage with solar installations to ensure a reliable and resilient energy supply will complement the industry landscape.

Should you choose an EPC contract for a solar project?

Given the significant monetary value of EPC Contracts, and the potential adverse consequences if problems occur during construction, the lowest price should not be the only factor used when selecting a Contractor. As noted earlier, an EPC Contract is one of a suite of agreements necessary to develop a solar project.

Will EPC contracts provide for the handover of a solar facility?

EPC Contracts will not provide for the handover of the solar facility to the Project Company, and the PPA will not become effective until all commissioning and reliability trialing has been successfully completed.
