

# Solar storage inverter tender price in Finland 2025

How much solar power will Finland have by 2030?

According to the Finnish TSO, Fingrid, the country is expected to reach 7 GW of cumulative installed solar capacity by 2030. Big deals keep being announced, as international independent power producers and leading investors in the RE market are filling up swelling pipelines and announcing the construction of utility-scale PV plants in the country.

Will solar inverter prices fluctuate in 2025?

With increasing production, the global solar inverter prices are expected to be more competitive. However, supply chain disruptions and material costs may impact affordability. Factors like silicon shortages, shipping delays, and tariffs on electronic components could lead to fluctuating prices throughout 2025.
