

# Storing talents and accumulating energy

What is time talent energy?

In *Time, Talent, Energy*, Michael Mankins and Eric Garton provide organization-wide solutions that leaders can use to maximize their businesses' productive power, overcome organizational drag, and gain an edge over their competition. The business world moves at a breakneck pace--yet in many organizations, work moves slowly.

How can leaders boost their employees' time & talent?

Leaders who learn to boost and harness their organizations' energy can multiply the impact of their employees' time and talent. The key is to tap the power of engagement, inspiration, and a strong company culture. When leaders excel at managing scarce resources, they gain a powerful advantage over their competitors.

Why do we need a global race for talent?

Meanwhile, Harvard University's William Kerr argues that countries adept at attracting and retaining top performers will be better positioned to counter demographic pressures such as aging populations and slowing productivity growth. The global race for talent is not just about finding the brightest minds--it is about securing the economic future.

Why is latent talent undiscovered?

Across the world, latent talent often remains undiscovered--not for lack of ability but for lack of opportunity. The data illustrate this reality. Research by Xavier Jaravel of the London School of Economics and his colleagues shows that access to education, family income, and social networks shape who becomes an inventor.

Wait, no - actually, the real crisis isn't just about generating clean energy. It's about retaining top talent and perfecting storage solutions simultaneously....
