

Successful bid price of business energy storage project in China 2026

What is the largest energy storage procurement in China's history?

The tender marks the largest energy storage procurement in China's history. In what is described as the largest energy storage procurement in China's history, Power Construction Corporation of China (PowerChina) is targeting an unprecedented cumulative storage capacity of 16 GWh. The bids were opened on December 4.

How much does energy storage cost in China?

In December, PowerChina's 2025-2026 energy storage system procurement, which sought 16 GWh of BESS, saw bids ranging from \$60.5/kWh to \$82/kWh, averaging \$66.3/kWh. In January, CGN New Energy procured 4.5 GWh of grid-forming BESS and 6 GWh of grid-following BESS.

How much does a Chinese company bid?

The average bid of the first six candidates was 0.4730 yuan/Wh, while the bids of the three alternative companies were somewhat higher and stood at 0.4738 yuan/Wh, 0.486 yuan/Wh and 0.4784 yuan/Wh. The latest results follow in the footsteps of recent procurements which saw similarly low prices.

How will powerchina select a qualified supplier for energy storage system equipment?

According to the previously announced plan by PowerChina, this tender aims to select qualified suppliers for energy storage system equipment for 2025-2026. After the selection, a framework agreement will be signed.

While 12 projects won awards in the first tranche of the recent grid-scale energy storage auctions in Greece, what of the 500 that didn't?

The procurement exercise has attracted 67 battery energy storage companies but only six have emerged as winners. The average bid stood at CNY 0.473/Wh (\$65/kWh).

Grid firm power capacity contracts, available to cover peak demand when needed, would be allocated via auctions with successful bidders being paid a fixed monthly fee for megawatts available and a price in euro, ...

The lowest EPC price for energy storage in China in May 2024 was 0.96 yuan/Wh, while the average bid price for lithium iron phosphate (LFP) energy storage EPC was ...

Energy networks in Europe need energy storage to enable decarbonisation of the system while maintaining integrity and reliability of supply.

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity. While it remains to be seen what the US administration might impose ...

Successful bid price of business energy storage project in China 2026

Asia-Pacific (APAC) region is expected to dominate the global energy storage market, accounting for 49% of upcoming energy storage projects by 2030. Australia, China and India are among ...

According to the Q1 2025 US Energy Storage Monitor from Wood Mackenzie and the ACP, energy storage installations surpassed 12GW in 2024.

Discover the Top 10 Energy Storage Trends plus 20 out of 3400+ startups in the field and learn how they impact your business.
