

# Successful bid price of business energy storage project in Spain 2025

Can Spain deploy large-scale energy storage with co-financing of 85%?

The European Commission on Monday greenlit a new aid scheme to enable Spain to deploy large-scale energy storage with co-financing of up to 85%. From ESS News The European Commission on Monday approved a new aid scheme for the deployment of large-scale electricity storage in Spain.

What does the European Commission say about energy storage in Spain?

La Moncloa. 17/03/2025. European Commission approves new 700 million aid scheme to boost energy storage in Spain[News]The Ministry of Ecological Transition and Demographic Challenge will promote the large-scale deployment of this technology by co-financing investments of up to 85%.

Will Spain be able to deploy large-scale electricity storage?

The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in hybridisation with renewable energy facilities and stand-alone and thermal.

What is Spain's energy storage program?

For stakeholders in battery storage,thermal storage,and pumped hydro,this program offers not only financial backing but also long-term stability and political support. Spain has launched a EUR700 millionenergy storage program to support battery,thermal,and pumped hydro projects,aiming to deploy 2.5-3.5 GW of capacity.

Does Spain have a state aid scheme for energy storage?

The European Commission has approved a EUR699 million state aid schemein Spain to support the deployment of up to 3.5GW of energy storage.

Can energy storage projects get 85% co-financing?

Standalone and renewables-plus-storage battery projects can apply for up to 85% co-financing,along with pumped hydro and thermal energy storage sites. Friday saw the publication of a call for applications for energy storage projects hoping to receive support from a EUR700 million (\$794 million) EU-funded program in Spain.

Search all the battery energy storage system (BESS) projects, bids, RFPs, ICBs, tenders, government contracts, and awards in Spain with our comprehensive online database.

Experts predict what 2025 holds for U.S. energy policy: EV battery costs fall, energy storage demand surges, carbon removal hits scale, permitting reform in D.C.

Spain has emerged as the leading PPA market in Europe, driven by its rapid renewable energy expansion. As solar and wind continue to gain ground in the country"s energy mix, Power ...

# Successful bid price of business energy storage project in Spain 2025

EASE is glad to support Energy Storage 2025, ACI's 12th edition in this series, taking place from 26 - 27 November 2025 in Barcelona, Spain.

A successful implementation will help reduce volatility prices and enable the entry to technology storage in the energy mix. Falling battery cost, What will be its impact on the market?

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector continues to grow as developers ...

Wholesale market optimisation involves leveraging the energy storage assets to maximise revenues by price optimisation and time shifting in an auction for electricity delivered on the ...

As of early 2025, Spain has roughly 1 GWh of grid-scale storage under construction, according to industry sources. This new wave of funding could accelerate the build-out, enabling developers, integrators, and OEMs to ...
