

Successful bid price of commercial energy storage project in Poland 2026

Is energy storage a good investment in Poland?

In Poland, interest in energy storage investment has been evident for some time. Last year's main auction of the power market, with capacity delivery for 2029, further bumped up the capacity of storage projects.

How much storage capacity does Poland have in 2024?

The Polish Economic Institute reported that in the power market's main auction, which was held in December 2024, storage capacity of around 2.5 GW was contracted, indicating that this was a 44 percent increase over 2023, in which the total contracted for batteries was 1.7 GW.

How many projects in Poland have received a grid connection offer?

As of October 2023, around 9 GW of projects have received grid connection offers from Poland's Transmission System Operator PSE. Only 6 projects with a total capacity of around 1.5 GW, have agreed on the proposed terms with the TSO, with an expected connection date post-2027.

Why should European Energy Invest in battery projects?

European Energy's battery projects also align with broader European Union goals to achieve net-zero emissions and enhance energy security. By expanding its presence in the battery sector, the company aims to become a leader in energy storage, facilitating the transition to a cleaner and more resilient energy grid.

How many projects are co-located with PV and storage?

The list includes 9 projects co-located with PV and storage developed by Alseva and Fotowatio Renewable Ventures. The location of the projects with a grid connection offer by PSE, the Polish Transmission System Operator. Source: LCP Delta STOREtrack.

Why is battery storage a key business area for European energy?

Since 2024, European Energy has prioritised battery storage as a key business area, with developments underway in many of the markets where the company operates. "Batteries allow us to utilise our renewable energy parks more effectively and efficiently.
