

Successful bid price of enterprise ESS system project in Vietnam 2025

How a Bess project is promoting energy storage in Vietnam?

Encouraging domestic enterprises to invest in new technologies will promote the growth of the energy storage industry in Vietnam. Investment in BESS projects in Vietnam is attracting the attention of international partners due to the country's strong potential for RE development.

Does Vietnam have a Bess market?

Currently, the BESS market in Vietnam is nascent, with significant limitations in terms of technical expertise and infrastructure. As at November 2024, Vietnam had only three pilot BESS projects: one at Power Engineering Consulting Joint Stock Company 2 (PECC2), another at VinFast and a third at Kehua Digital Energy in Khanh Hoa.

Does Vietnam have a Bess project?

Although no large-scale BESS projects have been implemented yet, Vietnam has put in place the conditions for BESS roll-out. Vietnam has a growing number of engineers and specialists in the RE sector. Training programmes at universities and research organisations are beginning to place emphasis on energy storage technology.

Who can bid on Vietnam tenders?

All companies and individuals who are capable of fulfilling the requirements can potentially bid on Vietnam tenders. There might be additional restrictions based on domicile, experience and qualifications depending on the project's nature and complexity. What are the top products and services procured by Vietnam tenders?

What are the benefits of bidding on Vietnam tenders?

Bidding for tenders in Vietnam is extremely lucrative for companies of all sizes. Vietnam tendering authorities release contracts for most of the products and services procured by them benefitting small, medium and large enterprises. A few of the benefits of bidding on Vietnam tenders are -

How can Vietnam continue to promote re and Bess projects?

Diversifying funding sources and support mechanisms is a crucial factor in helping Vietnam continue to strongly promote RE and BESS projects and, at the same time, achieve its energy transition and green-house gas emission reduction goals.
