

The latest news on new energy storage stocks

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.

Is Bloom Energy a good energy storage stock?

Bloom Energy is one of the smaller picks on this list, but it may be the most dynamic energy storage stock out there. It specializes in advanced fuel cell energy platforms, which use a proprietary solid oxide technology to convert natural gas, biogas or hydrogen into electricity with low or even zero carbon emissions.

Is energy storage a critical asset?

Layer in heightened demand from broad electrification and data centers (especially AI workloads that run 24/7, which is expected to quadruple by 2030), and energy storage is now seen as a critical asset. Its investment thesis breaks down into two interconnected waves: The first is the buildout of grid-scale batteries.

Is this Australia's largest DC-coupled hybrid battery energy storage system?

Finnish marine and energy technology group Wärtsilä will deliver what it claims is Australia's largest DC-coupled hybrid battery energy storage system (BESS) for the National Electricity Market (NEM).

Why do we need reliable energy storage solutions?

As industries across the board are rapidly embracing renewable energy worldwide for a more sustainable future, the need for reliable energy storage solutions has surged significantly over the past decade.

Does BNEF still expect a strong demand for batteries?

Nonetheless, BNEF still expects strong demand for batteries, as the policy doesn't explicitly require mandates to stop. Since the policy announcement, some provinces across China have continued to announce mandates stipulating that new solar and wind projects must be paired with batteries.

The best solid-state battery stocks are from companies working to mass-produce this technology in the electric vehicle market. Here are our top picks for solid-state battery stocks.

Despite new foreign sourcing restrictions, reduced policy and trade uncertainty has brightened the outlook for U.S. storage players, the energy research firm said Monday.

As industries across the board are rapidly embracing renewable energy worldwide for a more sustainable future, the need for reliable energy storage solutions has ...

The latest news on new energy storage stocks

China market: Pumped Hydro Storage share falls below 50% for the first time. Non-hydro Storage accumulative installations surpass 50GW for the first time. According to CNESA DataLink's Global Energy ...

Global markets are revolutionizing with growing environmental concerns and rising attention towards clean energy adoption. Market leaders are capitalizing on this trend by ...

The scene is set for significant energy storage installation growth and technological advancements in 2025. Outlook and analysis of emerging markets, cost and supply chain risk, storage demand growth ...

Its solutions include a grid-scale industrial-strength energy storage product, and that makes FLNC stock a great way to look at larger-scale energy storage applications.

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

Proponents say sodium-ion batteries degrade more slowly, operate more efficiently and have lower fire risk. But high-profile failures cloud the U.S. market while China moves aggressively to ...

Portuguese utilities firm EDP expects to accelerate its solar and battery storage projects in Australia after securing government awards for long-term revenue generation, the company said on...

Salt River Project (SRP) and Flatland Storage LLC, a subsidiary of EDP Renewables North America LLC (EDPR NA) have entered into an agreement to provide 200 ...

The China Energy Storage Alliance (CNESA) has consistently adhered to standardized, timely, and comprehensive information collection practices to continuously track ...

Large-scale battery storage project in New South Wales, Australia, built with Tesla's Megapacks. Image: Edify Energy. "It won't be long" before Tesla's stationary energy ...

While most investors are focused on Tesla's electric cars, the company's fastest-growing product category is hiding in plain sight.

The U.S. energy storage market is stronger than ever, and the cost of the most commonly used battery chemistry is trending downward each year. Can we keep going like this, or are we in a bubble bound to ...

The global energy storage market added 175.4 GWh of installed capacity in 2024, with the three major regional markets--China, the Americas, and Europe--continuing to ...

The latest news on new energy storage stocks

Energy storage systems are increasingly in demand to increase the effectiveness of solar power arrays, with the Energy Information Administration estimating in February that new utility-scale...

Energy Vault has acquired a 150MW battery energy storage system (BESS) in Texas. Meanwhile, Jupiter Power has entered an agreement with Austin Energy to provide 100MW of electricity ...

HOUSTON/WASHINGTON, D.C., March 19, 2025 -- The U.S. energy storage market set a new record in 2024 with 12.3 gigawatts (GW) of installations across all segments, according to the latest U.S. ...

The latest collaboration should further strengthen this Zacks Rank #2 stock's position in the rapidly evolving renewable energy space. The Zacks Consensus Estimate for ...

The New Energy Outlook presents BloombergNEF's long-term energy and climate scenarios for the transition to a low-carbon economy. Anchored in real-world sector and country transitions, it provides an independent set of ...

The U.S. energy storage market set a new record in 2024 with 12.3 gigawatts (GW) of installations across all segments, according to the latest U.S. Energy Storage Monitor ...

As utilities scramble to meet decarbonization targets, one thing's clear - the energy storage race is just entering lap 2. Whether you're a growth investor or sustainability ...

This year, new energy storage stocks have shown a remarkable trajectory, characterized by numerous positive trends, significant investments, and a growing interest in ...

In this report, we highlight the top energy storage stocks to watch--curated for their exposure to the grid-scale buildout and long-duration energy storage (LDES) innovations.

The global investment giant has launched its iShares Energy Storage and Hydrogen exchange-traded fund (ETF) on the Amsterdam stock exchange. The BlackRock fund will track the Stoxx ...
