

Us energy storage electric vehicle sales ranking

Which electric vehicle has the most sales?

Until 2018, the Chevrolet Volt had been on the market the longest and had the most overall sales, but the model was discontinued in 2019. In 2018, the newly introduced Tesla Model 3 rapidly increased vehicle sales and established the vehicle as the best-selling plug-in electric vehicle with nearly 50% of the market share.

Which EV models dominate the US EV market?

So, first things first, the Tesla Model Y and Tesla Model 3 still dominate the US EV market, accounting for about half of the market on their own despite the dozens of models now for sale. The Chevy Equinox EV has also now risen to a sizable volume, though, and is on track to sell over 50,000 units a year. Not amazing, but not too shabby.

What is the best-selling electric vehicle?

In 2018, the newly introduced Tesla Model 3 rapidly increased vehicle sales and established the vehicle as the best-selling plug-in electric vehicle with nearly 50% of the market share. To view more details, notes, and acronyms, please download the Excel spreadsheet.

Do Tesla models still dominate the US EV market?

I will include embedded versions of these charts on the bottom of this article, and those now offer easier viewing than the static charts (on a computer). So, first things first, the Tesla Model Y and Tesla Model 3 still dominate the US EV market, accounting for about half of the market on their own despite the dozens of models now for sale.

How much of luxury car sales go to electric vehicles?

The 23% share of luxury vehicle sales going to electric vehicles in Q1 2025 highlights the premium market's embrace of electric technology, with consumers willing to pay higher prices for advanced electric features and performance.

What is the electric vehicle market share landscape?

The electric vehicle market share landscape in the United States reflects a maturing industry with increasing competition and consumer choice. Tesla's 46% market share in Q1 2025 represents a continued decline from its peak dominance, dropping from 62% in 2022 to 55% in 2023, and 49% in 2024.

At the end of 2020, electric vehicles sales in some places grew year on year despite the pandemic. The global EV sales increased by 40-45%, and the U.S. sales rose 4% while overall car sales decreased 13 ...
