

# Warrington solar energy storage

Which solar farms are in Warrington Brough?

The York Solar farm has capacity of 34.7MWp and the Hull site 25.7MWp solar farm. Both sites are hybrid with integrated battery storage with 27MWh installed at York, and 20MWh at Hull. Warrington Brough Council has worked with solar farm developer and operator GRIDSERVE to develop and acquire these assets.

Why is Warrington investing in solar?

In Warrington's case, major investments in solar generation have been driven from the finance department. Early experience with local solar projects, putting panels on local homes and a large commercial roof, helped build an appetite for renewable energy investment.

Are solar farms a financial opportunity for Warrington?

Solar assets are seen as a financial opportunity that can help relieve financial pressures on the council rather than add to them. With difficulty finding potential sites for solar farms locally, Warrington looked for opportunities further afield. It now owns solar farms at sites near York and Hull.

Who is Warrington storage?

Warrington Storage is a family run suburban storage facility offering easy, secure 24/7 access in the heart of St Albans, Christchurch. It can be hard to know how long you are going to need to store items sometimes so we offer very flexible tenancies from short term to long term to suit your requirements.

How secure is Warrington storage?

The complex is monitored by a 24hr security system service. Warrington Storage is a family run suburban storage facility offering easy, secure 24/7 access in the heart of St Albans, Christchurch.

Why is Cirencester hybrid solar farm important for Warrington?

"The completion of Cirencester Hybrid Solar Farm is great news for Warrington. It will provide a huge boost to our ongoing work to tackle the climate emergency, reduce greenhouse emissions, and tackle fuel poverty in our borough.
