

# West africa energy storage bid winning announcement latest

How many battery energy storage projects are there in South Africa?

A total of five projects were awarded under South Africa's Battery Energy Storage Procurement Program by the country's Department of Mineral Resources and Energy in March 2023. The projects make up a 513 MW tender and are poised to provide capacity, energy, and ancillary services throughout South Africa.

Why did South Africa greenlit 616 MW in new battery storage projects?

South Africa greenlit 616 MW in new battery storage projects as part of its energy storage scheme, a \$530 million investment boosting national grid capacity and championing local industry wins.

Who are the preferred bidders for a battery energy storage system?

A consortium consisting of renewable energy developer, Mulilo, and independent power producer, EDF Renewables, has been selected as the preferred bidders for three battery energy storage system (BESS) projects in South Africa.

How will Bess projects impact South Africa's Energy Security?

As South Africa continues to grapple with frequent blackouts and load shedding, these BESS projects will help mitigate risks and contribute to the country's energy security. The Gainfar Project will be connected to the Ngwedi substation, while the Boitekong Project will be connected to the Marang substation.

How much does a Bess project cost in South Africa?

The 123 MW Retreat BESS project at the Merapi substation, with an evaluation price of R2 477.86/MWh. Meanwhile, Scatec, of Norway, which has a large South African presence, prevailed with its 123 MW Haru BESS project at the Leander substation, with a R2 037.10/MWh evaluation price.
