

Wholesale gel battery storage price list in Israel

How much does a gel battery cost?

Gel batteries are considered a type of VRLA battery and suspend their lead plates inside a thicker gel instead of a liquid solution. These batteries generally last between 2-5 years and cost anywhere from \$100-\$900. The cost typically goes up as the capacity of the battery increases.

Do gel batteries outlast AGM batteries?

In cold climates AGM capacity loss is minimal and will have a slightly higher voltage at lower temperatures. In hot weather climates, gel batteries tend to outlast AGM batteries due to the nature of the Deka gel electrolyte formula. Both are considered "non-spillable".
