

# Wholesale household energy storage price list in Greece

How much does electricity cost in Greece?

All these components combined determine the final retail electricity price that end-users pay. Eurostat data (for 2022) showed Greek household electricity prices (excluding taxes) ranged roughly EUR0.34-EUR0.42/kWh depending on consumption band - among the higher in the EU, due to heavy reliance on imported gas at the time.

What are the different types of retail tariffs in Greece?

Tariff Categorization: As of January 2024, Greece reorganized retail tariffs into three main types - Fixed (blue), Variable (yellow), and Dynamic (orange). Fixed plans have a constant price for the contract duration (e.g. 12 months).

What is Greece doing in 2024?

By 2024, Greece hit a major milestone: renewables covered over 50% of electricity consumption, thanks to rapid growth in solar, wind, and hydropower. Natural gas remains the top fossil fuel, while coal (lignite) is being phased out--dropping to just 6% of generation in 2024. Oil is mostly used on non-interconnected islands.

In addition, technological developments in renewable energy production, energy storage, electrical mobility and heating give Greece, for the first time, the opportunity to reduce its dependence on energy imports and ...
